FREZITE Group

We think automotive

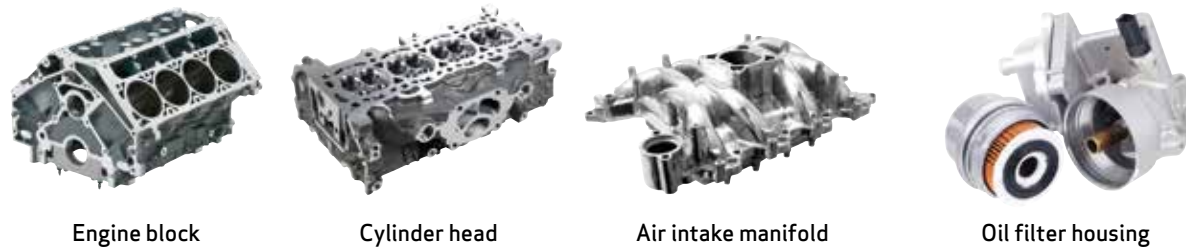

The challenges of the automotive industry are part of FMT'S DNA. Our Tooling Systems are robust and proven within our growing automotive customer portfolio. FMT understands this technological sector and providing the correct technical solutions is our engineering vocation. That's why our highly qualified team is geared towards the development of special solutions customized to the specific needs of each customer and their machining projects. With four decades of experience as a supplier in this highly competitive professional market sector. FMT's policy and commitment towards our customers is to increase productivity and reduce operations costs.

... because every customer is unique.

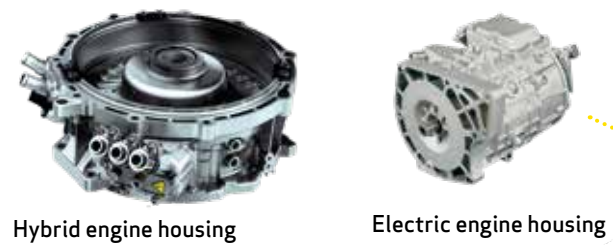

FMT, your partner for success

More than tools, a total solution provider, customized according the customer's needs. FMT has developed a new business model of services. Investing in a strategic partnership to generate added value to the market, our aim is promote win-win partnerships for the benefit of our customers. From a tooling supplier to a total turnkey projects provider, FMT customers can choose the level of service required to meet their business needs. Proximity, efficiency and flexibility are attributes of our dynamic team, that make working with us easy.
